Corodyn P1/P2

Balloon floatation catheters made of Polyurethane (PUR)

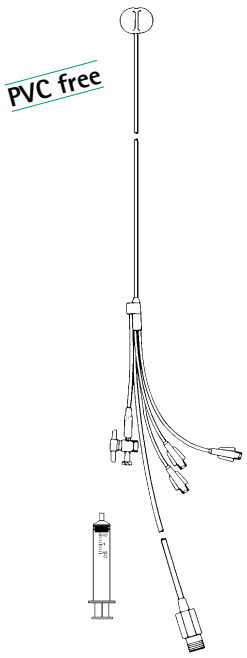
	Corodyn P1/P2	Code-Number	Sales unit-pcs.
	Balloon floatation catheters for hemodynamic pressure measurement – catheter length 110 cm – catheter marking every 100 mm from the catheter tip as an indicator of depth of introduction and position of catheter – easy handling – safe insertion – radio-opaque – excellent pressure transmission		
	Corodyn P1 Balloon floatation catheter with distal lumen – made of PUR – antithrombogenic material – free of toxic plasticizers		
	F5	**5011590**	5
	F6	**5011698**	5
	F7	**5011795**	5

	Corodyn P2 Balloon floatation catheter with two lumina for simultaneous pressure measurement and application of infusions or medications – made of PUR – antithrombogenic material – free of toxic plasticizers – distance between exit port and catheter tip 20 cm		
	F7	**5021740**	5

Corodyn TD / TD-I

Thermodilution catheters with balloon made of Polyurethane (PUR)

	Corodyn TD	Code-Number	Sales unit-pcs.
	Thermodilution catheter with balloon for measurement of haemodynamic pressure and cardiac output – catheter (4 lumina) with lumen for injection of a cold bolus and distal lumen for pressure measurement – catheter length 110 cm – thermistor, 35 mm from catheter tip – catheter marking every 100 mm from the catheter tip as an indicator of depth of introduction and position of catheter – easy handling – safe introduction – radio-opaque – excellent pressure transmission – thermistor resistance at 37°C 14,000 Ω ± 15 %, sensitivity 520 Ω/°C – special three-pin plug connector for all standard computers and patient monitors – made of PUR – antithrombogenic material – free of toxic plasticizers		
	Corodyn TD		
	F5	**5041406**	5
	F6	**5041414**	5
	F7	**5041422**	5
	F7, S-Tip	**5041945**	5



Corodyn TD-I

Thermodilution catheter with 5 lumina
– same catheters as Corodyn TD but with additional lumen for simultaneous pressure measurement resp. for the application of infusions or medications

	Corodyn TD-I	Code-Number	Sales unit-pcs.
	PUR, F 7,5	**5041856**	5

Corodyn touch-free

Thermodilution catheters with balloon made of Polyurethane (PUR)

	Corodyn TD touch-free	Code-Number	Sales unit-pcs.
	Thermodilution catheter with balloon for measurement of haemodynamic pressure and cardiac output		
	Catheter with touch-free contamination guard – catheter contamination guard (110 cm) – test chamber – special connection of the contamination guard to the sheath		
	Corodyn TD catheter – catheter (4 lumina) with lumen for injection of a cold bolus and distal lumen for pressure measurement – catheter length 110 cm – thermistor, 35 mm from catheter tip – catheter marking every 100 mm from the catheter tip as an indicator of depth of introduction and position of catheter – easy handling – insertion – radio-opaque – excellent pressure transmission – thermistor resistance at 37 °C 14,000 Ω ± 15 %, sensitivity 520 Ω/°C – special three-pin plug connector for all standard computers and patient monitors – made of PUR – antithrombogenic material – free of toxic plasticizers		
	Corodyn TD touch-free		
	F7	**5040035**	5
	Corodyn TD-I touch-free Thermodilution catheter with 5 lumina – same catheter as Corodyn TD but with additional lumen for simultaneous pressure measurement resp. for the application of infusions and medications		
	Corodyn TD-I touch-free		
	F7.5	**5040043**	5

Corodyn

Accessories

		Code-Number	Sales unit-pcs.
	**Closed Injectate Delivery System for measurement of cardiac output by thermodilution** – simplification of the cardiac output measurement – contamination guard provides a closed system		
	CO-Kit Closed Injectate Delivery System to measure the cardiac output with room temperature injectate – Multi Add tubing system – dual-check-valve – syringe, 10 ml – three-way-stopcock		
	CO-Kit	**5040011**	25
	**In-line temperature probe** For in-line injectate temperature sensing at catheter injection site, sterile – with screw connection – with snap lock		
	with screw connection	**5040086**	25
	with snap lock	**5040088**	25

Corodyn

Balloon floatation catheters Technical data

Catheter	French size	B. Braun Introducer	Length	Maximum Balloon Capacity	Inflated Balloon Diameter	Recommended Guide wire	Distance between Exit Port and Tip	Inner Diameter of Distal Opening

$$k = \frac{(1.08)(C_T)60(V_I)}{1000}$$

Eledyn

Bipolar temporary balloon probe for anaesthesia and intensive care

	Eledyn	Code-Number	Sales unit-pcs.
	Bipolar temporary balloon probe for transvenous heart stimulation – excellent push and flexibility – catheter material: antithrombogenic Polyurethane (PUR), free of toxic plasticizers – the use of stainless steel for electrode rings and wires avoids formation of galvanic elements – stainless steel, gold-plated 2 mm pins ▪ **stimulation probe** 110 cm – catheter marking every 100 mm from tip of the probe as an indicator of depth of introduction and position of the probe – bipolar ▪ **electrodes** – electrode length 3 mm – electrode distance 10 mm – torque stability due to material and design – radio-opaque ▪ **with floatation balloon** ▪ **Omnifix® Lock** – disposable syringe – with plunger stop for exact volume of air / CO2 for balloon inflation – for connection to balloon lumen with stopcock		
	Eledyn stimulation probe with balloon F5	**5101506**	5
	Add-ON kit for Eledyn 2/F6 and Eledyn F5 EB10 – 1 Contamination guard – 4 Gauze pads 10 x 10cm, 8 plies – 1 Cutfix scalpel Fig. E11 – 1 Seldinger puncture needle 1.3 x 70 mm, light pink – 1 Guide wire J3 SFU70-035 in dispenser and with a straightener – 1 Intradyn® venous hemostasis introducer F6 with a blue stop cock, two closing cones and one protection cover.		
	Add-ON set for Eledyn 2/F6 and Eledyn F5 EB10	**5150020**	10

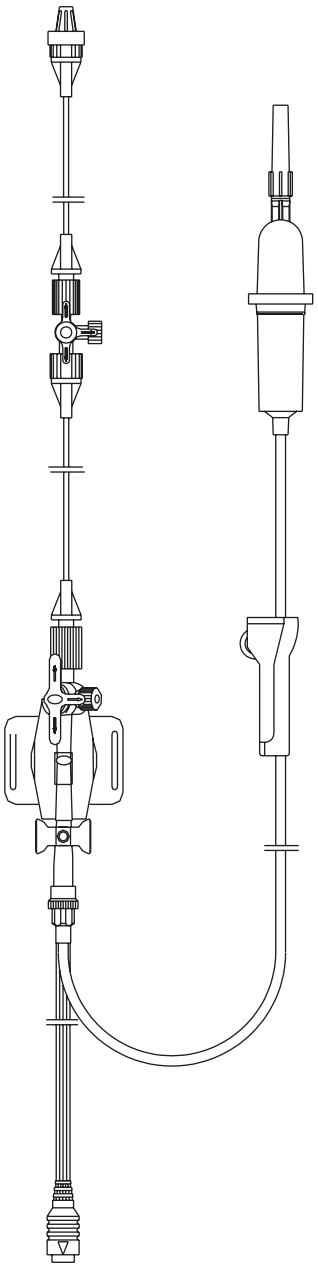
Eledyn 2/FX

Bipolar temporary stimulation probe for anaesthesia,
intensive care and electrophysiology

	Eledyn 2/FX	Code-Number	Sales unit-pcs.
 PVC free	Bipolar temporary stimulation probes for transvenous heart stimulation and electrophysiology – radiopaque catheter body – made of antithrombogenic Polyurethane – free of toxic plasticizers – length markings in step of 10 cm – touch protected connectors color coded hub for easy identification of catheter sizes **Technical data** – electrode distance: 10 mm – material: stainless steel – effective length: 112 cm – catheter material: Polyurethane, radio-opaque – resistance: < 60 Ω – plug: 2 mm stainless steel		
	Eledyn 2/F4		
	Eledyn 2/F4 - straight	**5151503**	5
	Eledyn 2/F4 - C	**5151520**	5
	Eletrode surface: ring 12 mm²		
	Eledyn 2/F5		
	Eledyn 2/F5 - straight	**5151538**	5
	Eledyn 2/F5 - C	**5151554**	5
	Eletrode surface: ring 15 mm²		
 PVC free	**Eledyn 2/F6**		
	Eledyn 2/F6 - straight	**5151562**	5
	Eledyn 2/F6 - C	**5151589**	5
	Eletrode surface: ring 19 mm²		
	All Eledyn F4 an F5 probes include a peel-away cannula and a connectable Hemostop venous.		
	Recommended introducer for F6 probes: Tear-Away introducer sheath F6		

Combitrans®

Monitoring kits with disposable transducer Basic kits



Combitrans®	Code-Number	Sales unit-pcs.

Monitoring kit with disposable transducer for physiological pressure measurement

Complete system
- for high transmission of pressure signal
- time reducing
- avoids contamination at connections and during blood sampling

Combitrans® Monitoring kit

- **Intrafix M**
- special administration kit for pressure measurement

- **Combitrans® flush device**
- quick flush rate ≥ 1 ml/s
- continuous flush rate 3 ml/h at 300 mmHg

- **Combitrans® disposable transducer**
- compact and 100 % tested unit with excellent pressure transmission
- can be used in combination with all CF-class monitors
- adapts to interface cable with plug connection
- modern chip technology for an accurate registration of values
- precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability)
- straight fluid channel for an easy air-bubble free filling

- **Discofix-3**
- 2 three-way stopcocks red (arterial), blue (venous) or yellow (pulmonal arterial)

- **Combidyn® pressure tubing** 125 cm
- ø 1.5 x ø 2.7 mm
- with red (arterial), blue (venous) or yellow (pulmonal arterial) stripe

- **Combidyn® pressure tubing** 20 cm
- ø 1.5 x ø 2.7 mm
- with red (arterial) stripe, blue (venous) or yellow (pulmonal arterial) stripe

Combitrans® Monitoring kit

red (arterial)	**5202620**	20
blue (venous)	**5202604**	20
yellow (pulmonal arterial)	**5202617**	20

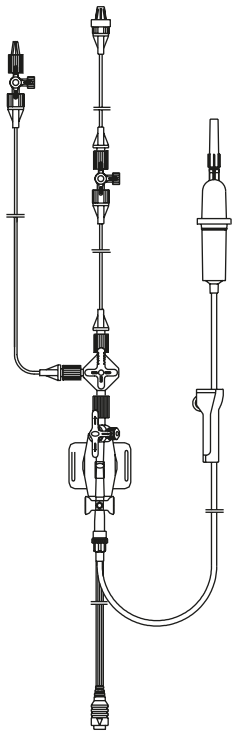
Combidyn® pressure tubing with three-way stopcock
- pressure tubing, red, ø 1.5 mm x ø 2.7 mm, 20 cm
- connected three-way stopcock, red

Combidyn® pressure tubing with three-way stopcock	**5208599**	50

Exadyn-Combitrans®

Monitoring kits with disposable transducer

	Exadyn-Combitrans®	Code-Number	Sales unit-pcs.



Monitoring kit with disposable transducer for measurement of arterial pressure and CVP (central venous pressure)

Complete system
– for optimal transmission of pressure signal
– time reducing

Exadyn-Combitrans® Monitoring kit

- **Intrafix M**
– special administration kit for pressure measurement

- **Combitrans® flush device**
– quick flush rate ≥ 1 ml/s
– continuous flush rate 3 ml/h at 300 mmHg

- **Combitrans® disposable transducer**
– compact and 100 % tested unit with excellent pressure transmission
– can be used in combination with all CF-class monitors
– adapts to interface cable with plug connection
– modern chip technology for an accurate registration of values
– precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability)
– straight fluid channel for an easy air-bubble free filling

- **Discofix-3**
– 2 three-way stopcocks red handle (arterial)
– 1 three-way stopcock blue handle (venous)

- **Combidyn® pressure tubing** 125 cm
– ø 1.5 x ø 2.7 mm
– with red (arterial) or blue (venous) stripe

- **Combidyn® pressure tubing** 20 cm
– ø 1.5 x ø 2.7 mm
– with red (arterial) stripe

- **Exadyn special 90° stopcock**
– 90° two-way safety stopcock for switch between arterial and venous measurement
– no shunts possible

Exadyn-Combitrans® Monitoring kit	**5202507**	20

PVC free

Exadyn-Combitrans® Monitoring kit PVC-free
Monitoring kit with disposable transducer for measurement of arterial pressure and CVP
– same configuration as above, however, **all components PVC-free** for active environmental protection

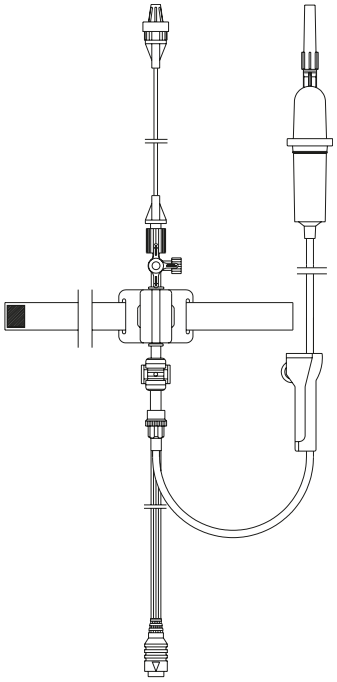
Exadyn-Combitrans® Monitoring kit PVC-free	**5212391**	20

Exadyn-Combitrans® Monitoring kit long tubings
Monitoring kit with disposable transducer and long tubings for measurement of arterial pressure and CVP
– same configuration as above, but with 200 cm long tubings instead of 125 cm

Exadyn-Combitrans® Monitoring kit long tubings	**5206994**	20

Combitrans® Special

Monitoring kits with disposable transducer Customized kit solutions



Create your individual Combitrans® monitoring kit for invasive pressure measurement

Individual and user-friendly solutions are combined with economical and ecological advantages:

1. Service through sales representative:
Demand analysis - kit proposal - sample and individual kit configuration according to your requirements - offer

2. Customized and user-friendly:
Your made-to-order solution out of our large B. Braun range - reduction of preparation time - designed and packaged due to customer specification - one order number

3. Economical:
Standardization of work practices - relief of clinic personnel - easy material management - less money tight up for storage - less administration

4. Ecological:
Reduced packaging volume and waste - easy disposal

Components:
- Intrafix „M" special administration kit 150 cm
- Combitrans® flush device 3ml/h
- Combitrans® disposable transducer
- Discofix three-way stopcock, red
- Discofix three-way stopcock, white
- Combidyn® pressure tubing, red, 1.5 x 2.7 x 300 mm
- fixation tape 1.5 cm x 40 cm, velcro

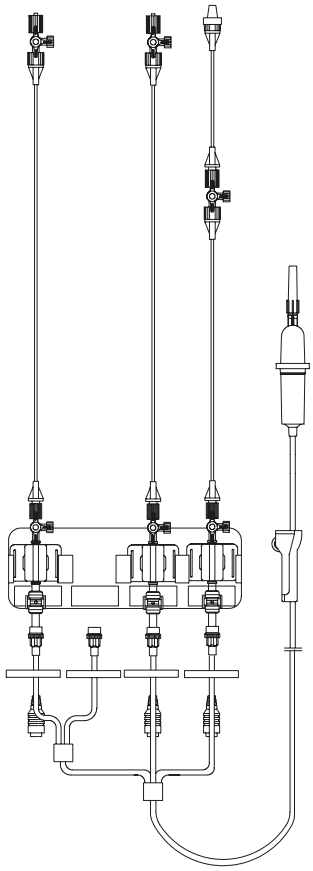
Combitrans® Monitoring Kit „Fixation tape"
Monitoring kit to fix the transducer at the patient's arm.
High pressure transmission due to short pressure tubing

- easy patient care, especially in intensive care units due to a short and direct connection between transducer and puncture site
- high transmission of pressure signal
- less dead volume in the pressure tubing
- less tubing in working area

	Code-Number	Sales unit-pcs.
Combitrans® Monitoring Kit "fixation tape"	**5216200**	20

Combitrans® Special

Monitoring kits with disposable transducer Customized kit solutions



Combitrans® Monitoring Double Kit (without illustration)
- Intrafix special administration kit, double
- two Combitrans® disposable transducers with flush device 3 ml/h and Discofix three-way stopcock (red and blue)
- two Combidyn® pressure tubing 125 cm (red and blue)
- two Discofix three-way stopcocks (red and blue)
- Combidyn® 20 cm red as arterial extention

Combitrans® Monitoring Double Kit (without illustration)

	Code-Number	Sales unit-pcs.
without attachment plate	**5201152**	20
with attachment plate	**5200830**	20

Combitrans® Monitoring Triple Kit (without illustration)
Same as Combitrans® monitoring double kit but with
- Intrafix special administration kit, triple
- additional Combitrans® disposable transducer with flush system and Discofix three-way stopcock yellow
- Combidyn® pressure tubing 125 cm yellow connected with Discofix three-way stopcock yellow
- mounted on a quadruple plate

	Code-Number	Sales unit-pcs.
Combitrans® Monitoring triple kit (without illustration)	**5200849**	20

Combitrans® / Intrafix M

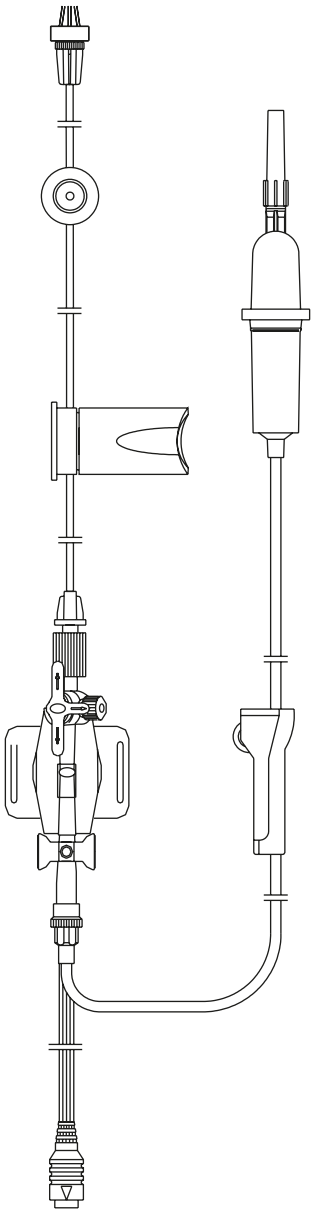
Disposable transducer / Infusion device

	Combitrans®	Code-Number	Sales unit-pcs.
	Disposable transducer for physiological pressure measurement – compact unit with excellent pressure transmission – can be used in combination with all CF-class monitors – adapts to interface cable with plug connection – modern chip technology for an accurate registration of values – precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability) – straight fluid channel for an easy air-bubble free filling		
	Combitrans® disposable transducer	**5203660**	20
	**Intrafix M** – special administration kit for pressure measurements – plastic spike in accordance with ISO – dropper in accordance with DIN 58362-1, 20 drops = 1 ml ± 0.1 – flexible lower section of drip chamber permits rapid adjustment of fluid level – 15 µm fluid filter in accordance with DIN 58362/1 – tubing length approx. 150 cm – roller clamp – lock-fitting		
	Intrafix M	**40700380**	100

Haemofix®-Combitrans®

Monitoring kit with disposable transducer for closed blood-sampling

	Haemofix®-Combitrans®	Code-Number	Sales unit-pcs.



Monitoring kit with disposable transducer for physiological pressure measurement and closed blood sampling

Complete System
- integrated reservoir and port for closed blood sampling
- high accuracy for blood gas analysis and low risk of contamination is achieved with minimum blood waste
- time reducing

Haemofix®-Combitrans® Monitoring Kit
- Intrafix „M" administration kit
- Combitrans® flush device 3ml/h
- Combitrans® disposable transducer
- Discofix three-way stopcock, red
- Combidyn® pressure tubing 1.5 x 2.7 x 1800 mm red with integrated Haemofix® reservoir 5 ml (20 cm prior to transducer) and blood sampling port (30 cm prior to distal end)

Haemofix®-Combitrans® Monitoring Kit	**5213505**	20

Haemofix®-Exadyn Monitoring Kit (without illustration)
Same configuration as 5213505 but with the option to switch between arterial pressure and CVP.

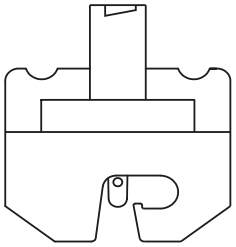
Additional components:
- Exadyn special 90° stopcock
- Combidyn® pressure tubing 1.5 x 2.7 x 1500 mm, blue
- Discofix three-way stopcock, blue

Haemofix®-Exadyn Monitoring Kit (without illustration)	**5213516**	20

Haemofix®-Combitrans® Monitoring Kit double (without illustration)
Same configuration as 5213505 but with a second venous line, which allows the simultaneous measurement of two pressures.

Additional components:
- Combitrans® disposable transducer with flush device 3ml/h and Discofix three-way stopcock blue
- Combidyn® pressure tubing 1.5 x 2.7 x 1500 mm, blue
- Discofix three-way stopcock, blue

Haemofix®-Combitrans® Monitoring Kit double (without illustration)	**5213527**	20



Blood sampling adapter
- for needle-free blood sampling with blunt, concealed cannula
- single, sterile packaging
- Luer Lock

Blood sampling adapter Luer	**5213940**	70

Combitrans®

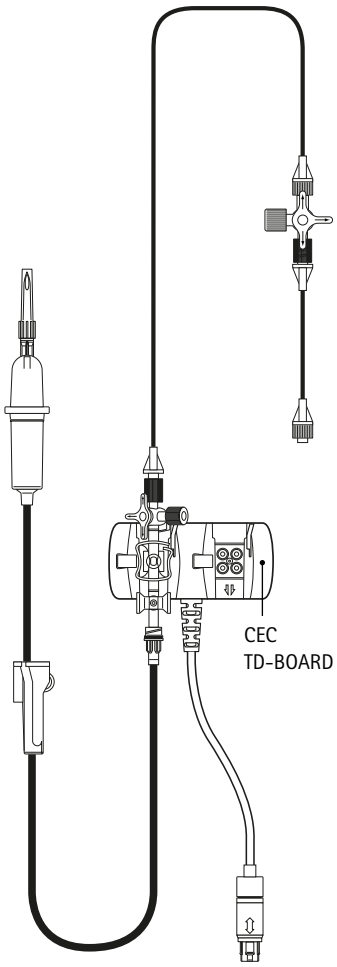
Attachment plates/Accessories

		Code-Number	Sales unit-pcs.
	**Combitrans® attachment plate for Siemens SC 9000** – exchange plate for integration into the Hemo-module of the patient monitor Siemens SC 9000 – for four Combitrans® disposable transducers		
	Combitrans® attachment plate for Siemens SC 9000	**5208741**	1
	**Combitrans® attachment plate** – for vertical attachment to infusion stand		
	Combitrans® attachment plate, quadruple	**5203597**	1
	Combitrans® attachment plate, double	**5214696**	1
	**Combi-holder for Combitrans® attachment plate** – for attachment to infusion stand		
	Combi-holder for Combitrans® attachment plate	**4086007**	1
	Attachment plate quadruple – special designed for the ICU (Intensive Care Unit) – click and go mechanism		
	Combitrans® attachment plate ICU quadruple	**5215700**	1
	**Attachment plate double** – special designed for Exadyn Kits – click and go mechanism		
	Combitrans® attachment plate Exadyn double	**5215600**	1
	**Attachment plate holder** – click and go mechanism – cable preservation – mountable in different positions		
	Combitrans® attachment plate holder	**5215800**	1

Combitrans® Easy Click

Monitoring kits with disposable transducer Basic kits

	Combitrans® EC	Code-Number	Sales unit-pcs.



Complete system
– for high transmission of pressure signal
- Easy click design
– time reducing
– avoids contamination at connections and during blood sampling

Combitrans® EC Monitoring Kit

- **Intrafix® M**
– special giving kit for pressure measurement

- **Combitrans® flush device**
– quick flush rate ≥ 1 ml/s
– continuous flush rate 3 ml/h at 300 mmHg

- **Combitrans® EC disposable transducer**
– compact and 100 % tested unit with excellent pressure transmission
– can be used in combination with all CF-class monitors
– modern chip technology for an accurate registration of values
– precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability)
– straight fluid channel for an easy air-bubble free filling
- cableless transducer subassembley

- **Discofix®-3**
– 2 three-way stopcocks red (arterial), blue (venous) or yellow (pulmonal arterial)

- **Combidyn® pressure tube 125 cm**
– ø 1.5 x ø 2.7 mm
– with red (arterial), blue (venous) or yellow (pulmonal arterial) stripe

- **Combidyn® pressure tube 20 cm**
– ø 1.5 x ø 2.7 mm
– with red (arterial) stripe, blue (venous) or yellow (pulmonal arterial) stripe

Combitrans® EC Monitoring Kit

red (arterial)	**5319289**	20
blue (venous)	**5319290**	20

Exadyn-Combitrans® Easy Click

Monitoring sets with disposable transducer

	Exadyn-Combitrans® EC	Code-Number	Sales unit-pcs.
	Monitoring kit with disposable transducer for measurement of arterial pressure and CVP **Complete system** – for high transmission of pressure signal – time reducing **Exadyn-Combitrans® EC Monitoring kit** ▪ **Intrafix® M** – special giving kit for pressure measurement ▪ **Combitrans® flush device** - quick flush rate ≥ 1 ml/s – continuous flush rate 3 ml/h at 300 mmHg ▪ **Combitrans® EC disposable transducer** – compact and 100 % tested unit with excellent pressure transmission – can be used in combination with all CF-class monitors – modern chip technology for an accurate registration of values – precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability) – straight fluid channel for an easy air-bubble free filling - cableless transducer subassembley ▪ Disco**fix®-3** – 2 three-way stopcocks red handle (arterial) – 1 three-way stopcock blue handle (venous) ▪ **Combidyn® pressure tube 125 cm** – ø 1.5 x ø 2.7 mm – with red (arterial) or blue (venous) stripe ▪ **Combidyn® pressure tube 20 cm** – ø 1.5 x ø 2.7 mm – with red (arterial) stripe ▪ **Exadyn special 90° stopcock** – 90° two-way safety stopcock for switch over between arterial and venous measurement		
	EXADYN-Combitrans® EC Monitoring Kit		
	Combitrans® EC Exadyn Monitoring Kit (arterial + venous pressure)	**5318575**	20

Combitrans® EC Special

Monitoring kit with disposable transducer

		Code-Number	Sales unit-pcs.
	Combitrans® EC Monitoring Double Kit – Intrafix® special giving kit, double – two CombitransEC disposable transducer assembleys with flush device 3 ml/h and Discofix® three-way stopcock (red and blue) – two Combidyn® pressure tubes 150 cm (red and blue) – two Discofix® three-way stopcocks (red and blue) – Combidyn® 20 cm red as arterial extention		
	Combitrans® EC Monitoring double kit – red/blue	**5318762**	20
	Combitrans® EC Monitoring Triple Kit (no illustration) Same as Combitrans® EC monitoring double kit but with – Intrafix® special giving kit, triple – additional Combitrans® disposable transducer with flush system and Discofix® three-way stopcock yellow – Combidyn® pressure tube 125 cm yellow		
	Combitrans® EC Monitoring triple kit – red/blue/yellow	**5318768**	20
	Combitrans® EC Monitoring Set 3 Plus Same as Combitrans® EC monitoring double set but with – Intrafix special giving set, quadruple, for additional transducer – 3 Combitrans® disposable transducers with flush device 3ml/h and Discofix® three-way stopcock (red, blue and white) – 3 Combidyn® pressure tubes 200 cm (red, blue)		
	Combitrans® EC Monitoring triple plus kit – red/blue/yellow	**5318766**	20
	Combitrans® EC Monitoring Kit Add-On Additional set for Monitoring Kit 2 Plus and 3 Plus – Combitrans® disposable transducer with flush device 3ml/h – Discofix® three-way stopcock white – Combidyn® pressure tubing 125 cm transparent		
	Combitrans® EC Monitoring single kit ADD ON	**5318776**	20

Combitrans® EC

Transducer Boards/ Holder/Accessories

	Code-Number	Sales unit-pcs.
Transducer Boards with standard hub		
CEC TD-BOARD,1-fold	**5225000**	1
CEC TD-BOARD, 2-fold	**5225005**	1

Combidyn®

Monitoring kit for pressure measurement with reusable transducer

	Combidyn®	Code-Number	Sales unit-pcs.
	Monitoring kit for physiological pressure measurement **Complete system** – for high transmission of pressure signal – time reducing – avoids contamination at connections and during blood sampling **Combidyn® Monitoring kit** Basic kit, without pressure dome ▪ **Intrafix M** – special administration kit for pressure measurement ▪ **Combidyn® flush device** – quick flush rate – continuous flush rate 3 ml/h at 300 mmHg ▪ **Discofix-3** – three-way stopcock, red ▪ **Combidyn® pressure tubing 125 cm** – ø 1.5 x ø 2.7 mm – with red stripes ▪ **Combidyn® pressure tubing 20 cm** – ø 1.5 x ø 2.7 mm – with red stripes		
	Combidyn® Monitoring Kit	**5205689**	25
	**Combidyn® Monitoring Kit** Basic kit, with pressure dome – Same configuration as above, but with pressure exchanging dome		
	Combidyn® Reusable Transducer/Disposable domes/Flush device	**5206502**	25
	for SensoNor 840 transducers	**5207410**	25
	for Hewlett Packard 1295 C transducers	**5207070**	25

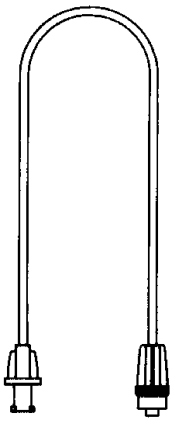
Combidyn®

Reusable Transducer/Disposable domes/Flush device

	SensoNor 844	Code-Number	Sales unit-pcs.
	Reusable physiological pressure transducer – highly accurate and robust piezoresistive transducer – easy handling – click and go fixing – cable length 3 m – dry connection from dome to sensor – precalibrated sensor with constant electrical parameters – high overload protection – high accuracy of measurement – can be used in combination with all CF-class monitors – gold plated for easier cleaning – long service life		
	SensoNor 844 pressure transducer	**5904001**	1
	Combidyn® Disposable (single use) domes for physiological pressure measurement – diaphragm made of PUR – transparent – easily filled, without air bubbles – luer-fitting resp. Linden / luer-fitting – single sterile packed		
	for SensoNor transducers 844 with stoppcock (without illustration)	**844-31**	50
	for SensoNor transducers 844 with two stoppcock	**5203320**	25
	for SensoNor 840 transducers	**5204100**	25
	for Gould P23 XL, P23 ID transducers and Statham	**5204917**	25
	for Hewlett Packard 1295 C transducers	**5207231**	25
	Combidyn® flush device System for arterial and venous catheter flushing – quick flush rates to fill the monitor systems or flush the catheter – continuous flow rate 3 ml/h at 300 mmHg – easy control due to rectangle test – transparent for visual control – lock-fittings – female/male/female		
	Combidyn® flush device	**5201500**	50

Combidyn®

Pressure tubings made of PVC



Combidyn®

Pressure tubing for the measurement of physiological pressure
- ø 1.5 x 2.7 mm
- undamped and accurate pressure monitoring
- pressure stability tested up to 8 bar
- transparent for visual control
- tubing of various lengths
- dead space approx. 1.2 ml/m
- tube length matches practical requirements
- colour-coding:
- red stripes (arterial)
- blue stripes (venous)
- yellow stripes (pulmonal arterial)

- **luer-fittings**

- with special screw thread
- male/female
- ABS

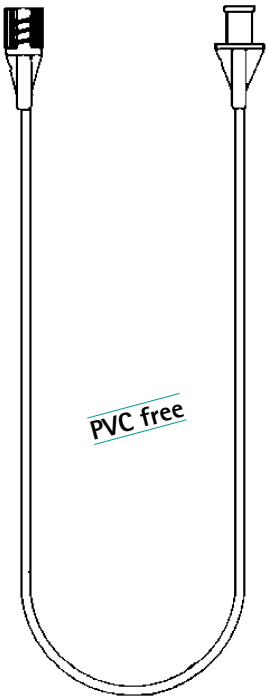
- connected three-way stopcock, red

Combidyn® pressure tubing with three-way stopcock	**5208599**	50

Combidyn®

Pressure tubing made of Polyethylene Adaptor



Combidyn®	Code-Number	Sales unit-pcs.
Pressure tubing for physiological pressure measurement and intravenous medications		
Combidyn® Polyethylene – transparent Polyethylene – especially useful for infusion of drugs with PVC-incompatibility – pressure resistance tested up to 8 bar – transparent for visual control – reduced dead space – easy handling due to flexible material – especially for paediatric and neonatal pressure measurement - tubing diameter ø 1.0 x 2.0 mm - dead space approx. 0.8 ml/m

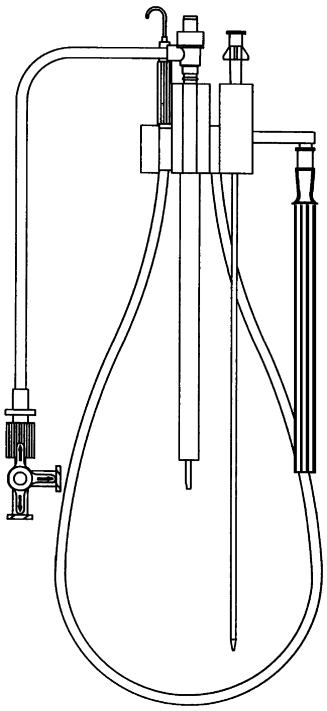
Intradyn® Venous

Introducer for anaesthesia and intensive care



Intradyn® Venous Hemostasis Introducer	Code-Number	Sales unit-pcs.

Percutaneous catheter introducer kit using the Seldinger technique according to Desilets-Hofmann

- **Intradyn® puncture needle, according to Seldinger, 1.3 x 70 mm (18 G)**
  - stainless steel, ø 1.3 mm (18G)
  - smoothly tapered fitting for easy introduction of the guide wire
- **Guide wire, 40 cm**
  - stainless steel, ø 0.035 „/0.89 mm
  - flexible straight tip
- **Vessel dilator, 205 mm, made of FEP**
  - flexible, causing minimal trauma to vessels
  - smoothly tapered transition to guide wire
- **Sheath, 115 mm, made of PUR**
  - thin-walled
  - smoothly tapered transition to vessel dilator
- **Hemostasis valve**
  - to avoid retrograde blood flow
  - for venous application
  - smoothly tapered transition for easy introduction of catheter
  - sideport with mounted three-way stopcock for easy administration of I.V. solutions and injection of medications
  - Lock-fitting

Intradyn® venous with hemostasis valve
- with J3-guide wire

F6 green	**5209749**	20
F7 orange	**5209757**	20
F8 blue	**5209765**	20

Intradyn® venous with hemostasis valve
- with straight guide wire

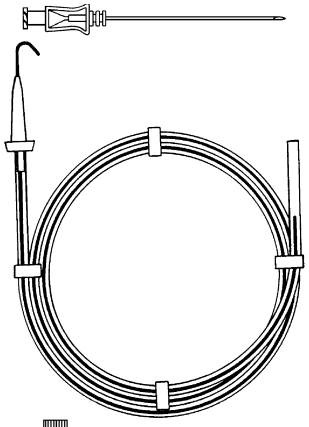
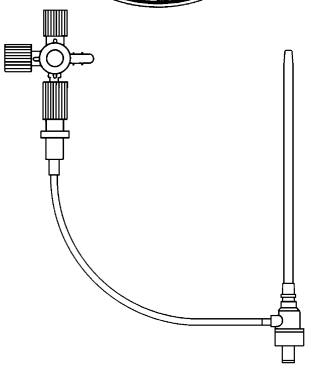
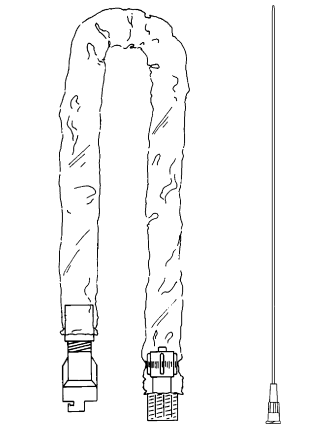
Intradyn® Special

Basic Intensive Care Kit







Intradyn® Basic Intensive Care Kit	Code-Number	Sales unit-pcs.
Intradyn® venous, percutaneous catheter introducer kit using the Seldinger technique according to Desilets-Hofmann – Intradyn® puncture needle ø 1.3 x 63.5 mm (18 G) – guide wire, 70 cm, ø 0.035"/0.89 mm flexible J3-tip with insertion tool or flexible straight tip – vessel dilatator, 205 mm made of FEP – venous hemostasis introducer sheath, 115 mm made of PUR – hemostasis valve – catheter contamination guard, 120 cm – disposable scalpel – 4 gauze pads, 10 x 10 cm, eight-ply		
Intradyn® basic kit F6	**5210950**	10
Intradyn® basic kit F7	**5210100**	10
Intradyn® basic kit F8	**5210097**	10
Intradyn® basic kit F9	**5210674**	10

Intradyn® Special

Complete Intensive Care Kit

	Intradyn® Complete Intensive Care Kit, F8	Code-Number	Sales unit-pcs.
	– disposable injection cannula 0.51 x 15.9 mm (25 G) – disposable injection cannula 0.72 x 38.1 mm (22 G) – insertion needle, 1.235 x 63.5 mm (18 G) – radio-opaque venous catheter introducer cannula made of FEP, 1.24 x 63.5 mm (18G) – 3 ml and 5 ml syringe (Luer-fitting) – guide wire, 45 cm, ø 0.035/0.89 mm with flexible J-tip with insertion tool or flexible straight tip – disposable scalpel – straight needle (23/8", 6 cm) with silk suture (75 cm, 30") – 2 x 2 gauze pads – 4 x 4 gauze pads – fenestrated drape – filter straw (13/4", 4.4 cm) – F8 venous hemostasis introducer sheath, 115 mm, made of PUR, with hemostasis valve and sideport with tubing and three-way stopcock – F8 vessel dilator 205 mm – catheter contamination guard (120 cm) – obturator F8, PUR mandrel to close the sheath		
	Intradyn® Complete Intensive Care Kit		
	F8	**5210003**	10

Create your individual Intradyn® Intensive Care Kit

Customized and user-friendly solutions are combined with economical and ecological advantages:

1. Service through sales representative:
Demand analysis - kit proposal - sample and customized kit configuration according to your requirements - offer

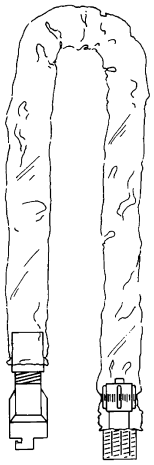
2. Individual and user-friendly:
Your made-to-order solution out of our large B. Braun range - reduction of preparation time - designed and packaged due to customer specification - one order number

3. Economical:
Standardization of work practices - relief of clinic personnel - easy material management - less money tight up for storage - less administration

4. Ecological:
Reduced packaging volume and waste - easy disposal

Intradyn®

Accessories

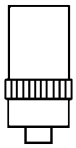


Catheter contamination guard for Intradyn® hemostasis introducer sheath
- proximal: fitting for safe fixation of the catheter or probe
- transparent contamination guard for visual control prevents contamination of catheters and probes during their introduction
- special connection to the sheath due to bayonet locking, 120 cm

	Code-Number	Sales unit-pcs.
Catheter contamination guard	**5210178**	50

Intradyn® guide wires (ø 0.035"/0.89mm) (without illustration)

	Code-Number	Sales unit-pcs.
J3-tip with straightener in dispenser	**5050529**	25



Haemostop
Hemostasis valve for insertion of catheters and probes combined with, e. g. Intradyn® venous without hemostatic valve
- avoids blood leakage
- smooth introduction of catheters and probes
- no closing cone
- Luer Lock-fitting
- valve for arterial and venous use
- continuous hemostasis

	Code-Number	Sales unit-pcs.
Haemostop	**5209641**	50

Intradyn® arterial puncture needle (Seldinger)
- Smoothly tapered design for easy introduction of the guide wire up to max. ø 0.035" (0.089 mm)
- Luer-Lock fitting

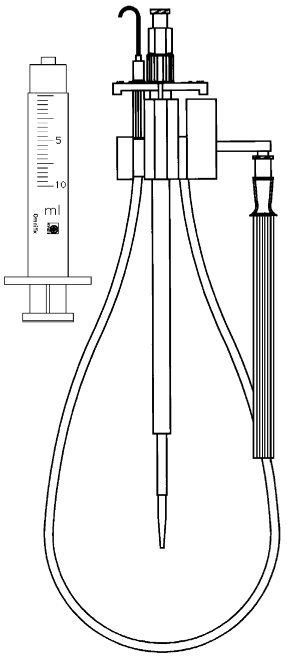
Intradyn® Tear-Away

Tear-Away Introducer

	Intradyn® Tear-Away	Code-Number	Sales unit-pcs.



Tear-Away introducer sheath using the Seldinger technique according to Desilets-Hofmann
– the pre-scored tearing line ensures a clean and easy sheath removal after catheter placement
– the spin-lock connector holds dilatator and sheath together, preventing dilatator from backing out of sheath during vascular access

Intradyn® Tear-Away

- **Intradyn® puncture needle according to Seldinger 1.3 x 70 mm (18 G)**
– made of stainless steel
– smoothly tapered hub transition for easy introduction of guide wire
- **Guide wire 40 cm**
– made of stainless steel, ø 0.035" / 0.89 mm
– flexible J3-tip and flexible straight tip
- **Vessel dilatator, 190 mm made of PE**
– flexible, minimal trauma to vessels
– smoothly tapered transition to guide wire
- **Introducer sheath, 160 mm made of FEP- thin-walled**
– smoothly tapered transition to vessel dilatator
- **Syringe Luer lock-fitting 10 ml**

Intradyn® dual Tear-Away Introducer
Splittable introducer set with two sheaths for the introduction of two probes for VDD- and DDD-pacemaker

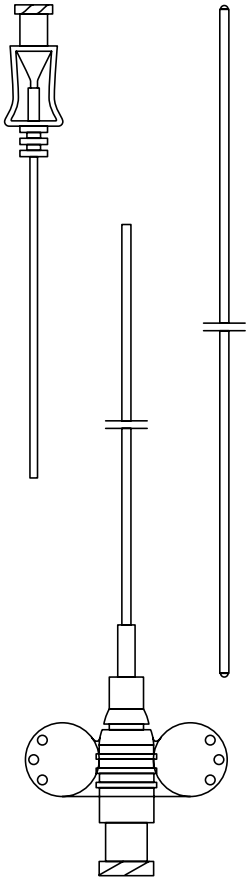
Same content as Intradyn® Tear-Away, however with two introducer sheaths and two dilatators

Intradyn® dual Tear-Away Introducer

F10	**5212537**	20

Arteriofix

Arterial catheter kits



Arteriofix

Arterial catheter kit for invasive monitoring of blood pressure and blood sampling using the Seldinger technique

- **Introducer needle** made of stainless steel
  - smoothly tapered hub transition for easy insertion of guide wire
  - integrated design, providing smooth transition from guide wire to needle and needle to catheter to ensure minimal trauma at puncture site
  - Luer lock fitting
- **Catheter** made of FEP
  - for pressure transmission and good physical and mechanical properties of the material
  - excellent tissue and blood compatibility
  - smooth surface prevents thrombogenesis
  - special tip for easy insertion
  - FEP catheters have good gliding characteristics during insertion
  - fixation wings at proximal end
  - colour-coded Luer lock-fittings
- **Guide wire** made of stainless steel
  - flexible straight tip
  - designed according to the different inner diameters of catheters

colour	size	capillary: mm [Ø]; length [mm]	needle: Ø [G; mm]; length [mm]	wire: length [cm] - Ø [Inch]	Code-Number	Sales unit-pcs.

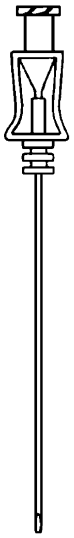
Arteriofix V

Arterial catheter kits

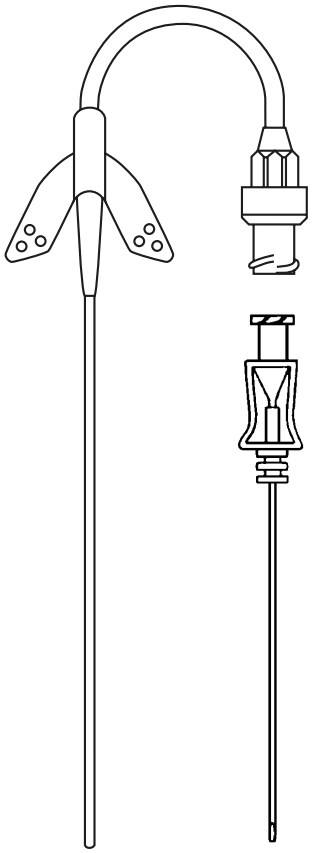
	Arteriofix V	Code-Number	Sales unit-pcs.



This new version of Arteriofix® convinces with its outstanding new features and with established components.

Catheter, consisting of:

- **Capillary**
  - made of FEP
  - excellent tissue and blood compatibility
  - smooth surface prevents thrombogenesis
  - special tip for easy insertion
  - outstanding gliding characteristics during insertion
- **Fixation wings**
  - wings made of PUR
  - soft wings adapt easily to the skin
  - three suture holes
  - continuous and smooth transition between wings and capillary
- **Connecting tubing**
  - 7 cm long PUR tubing
  - distance between puncture site and the connection area
  - strain relief at the puncture site during connection
- **Valve**
  - avoids blood reflux and facilitates the handling
  - provides a high leak tightness
  - does not affect the pressure measurement results



Introducer needle made of stainless steel
- smoothly tapered hub transition for easy insertion of guide wire
- integrated design, providing smooth transition from guide wire to needle and needle to catheter to ensure minimal trauma at puncture site
- Luer Lock fitting

Guide wire made of stainless steel
- flexible straight tip
- designed according to the different inner diameters of catheters
